PROFESSIONAL PROFILE

Systems Engineering student and full-stack developer with production experience: migrated a civic-tech platform's backend to NestJS and shipped its Android app on Google Play. Experienced with TypeScript, Node.js, React, Python and SQL, focused on secure APIs and automated testing, with a growing interest in data analysis.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, Java, Kotlin, SQL
- **Backend:** Node.js, NestJS, Next.js, Django, Django REST Framework, Spring Boot, Prisma, REST, OpenAPI/Swagger, JWT, OAuth 2.0, Auth.js, WebSockets
- **Frontend & Mobile:** React, Next.js (App Router), Tailwind CSS, TanStack Query, Zustand, React Native, Expo, EAS Build, FCM, Android
- **Databases:** PostgreSQL, PostGIS, MySQL, SQL Server, Redis, DynamoDB
- **Data & ML:** pandas, NumPy, scikit-learn, NLTK, TF-IDF, cosine similarity, recommender systems
- **Cloud & DevOps:** AWS (S3, Lambda, IAM), Docker, GitHub Actions, CI/CD, Render, Vercel, Neon, Git, Azure DevOps
- **Testing:** Jest, Supertest, unit and end-to-end testing, code coverage, security review (OWASP API Top 10)

EXPERIENCE

Full-Stack Software Developer | Quéjate.com.co | Mar 2026 – Oct 2026

Colombian civic-tech platform for filing complaints with public entities. Professional internship from Jul 2026.

- Migrated a live platform's backend from two Next.js apps to a single NestJS service (TypeScript, Prisma, PostgreSQL), incrementally and without changing the 43 endpoints used by the published mobile app.
- Built and shipped the Android app on Google Play (React Native, Expo), with Google sign-in (OAuth 2.0), a multi-step complaint form, map location and push notifications (FCM).
- Ran an OWASP API Security Top 10 audit across four repositories: documented 28 findings and fixed in production, among others, unauthenticated routes and a privilege escalation. Added rate limiting.
- Brought the backend to 3,861 automated tests (Jest, unit and end-to-end) with 99% line coverage, and set up CI/CD in GitHub Actions with dependency auditing and secret scanning.
- Delivered email submission of complaints with proof of delivery (Resend webhooks) and a delivery timeline, based on feedback from a regional government.
- Ran the infrastructure (Docker on Render, Neon, AWS S3 with least-privilege IAM, Vercel) and coordinated AI coding agents (Claude Code), owning decisions, merges and production testing across 158 pull requests.

PROJECTS

FindMyWorker | Home services marketplace (live in production)

- Semantic recommendation engine with TF-IDF, cosine similarity and PostGIS (MRR 0.75, 42% CTR), sub-50 ms geospatial search and real-time chat with WebSockets and Redis, built with Python, Django and React.

AeroMagdalena | Full-stack system for a regional airline

- REST API in Java with Spring Boot 3, JWT, role-based access, OpenAPI and Docker, plus a React and TypeScript SPA with TanStack Query and the full booking flow.

EDUCATION

B.Sc. Systems Engineering | Universidad del Magdalena | 2021 – Present

- Continuous self-study in data analysis, Machine Learning, microservices and spatial databases.

LANGUAGES

- **Spanish:** Native
- **English:** B2 (Upper Intermediate), Duolingo English Test: 130. Strong ability to read technical documentation and communicate in English.
