PROFESSIONAL PROFILE

Systems Engineering student with hands-on experience building end-to-end web and mobile applications. Proficient in Python/Django, Java/Spring Boot, React/TypeScript, and Android/Kotlin. Proven track record in performance optimization (searches <50 ms, test coverage >85%) and agile team collaboration. Seeking a professional internship to complete my degree.

TECHNICAL SKILLS

- **Backend:** Python, Django, Django REST Framework, Java, Spring Boot 3, Node.js, Next.js API Routes, WebSockets, JWT, NextAuth.js, Prisma ORM, OpenAPI/Swagger
- **Frontend:** React, TypeScript, JavaScript, Next.js (App Router), Tailwind CSS, TanStack Query, Leaflet
- **Databases:** PostgreSQL, PostGIS, MySQL, SQL Server, Redis
- **Cloud & DevOps:** AWS S3, AWS Lambda, Docker, Azure DevOps, Git, GitHub, CI/CD, ESLint
- **Mobile:** React Native, Expo, Kotlin, Android Studio, Google ML Kit (OCR), TTS, Clean/MVVM, EAS Build, FCM
- **ML/NLP:** scikit-learn, NLTK, TF-IDF, cosine similarity, recommendation systems

EXPERIENCE

Mobile Developer (React Native) — Quéjate.com.co | 2025–2026

Colombian citizen platform to file and track PQRSD (complaints and petitions) with public entities

- Built the full authentication module: email/password and Google Sign-In (OAuth 2.0), Bearer token session management with secure storage. Diagnosed and resolved a systemic 401 failure caused by a Cookie vs Bearer conflict.
- Implemented the PQRSD module: 4-step creation form with validation and reCAPTCHA, infinite scroll feed, detail view, likes, and card redesign with multimedia support.
- Developed advanced media handling: pinch-zoom and swipe gallery, inline video playback, client-side thumbnail generation with S3 upload, and disk/memory image caching.
- Integrated geolocation with map-based selection, reverse geocoding, Google Maps deep links, and automatic city/department detection.
- Configured push notifications (FCM): Android channels, token registration, and resolved a FIS_AUTH_ERROR caused by cross-project misconfiguration in Google Cloud.
- Managed the full release pipeline: EAS Build with preview/production profiles (AAB), per-environment variables, and complete Google Play submission.

Stack: React Native · Expo SDK 54 · TypeScript · TanStack Query · Zustand · EAS Build · FCM · AWS S3

Backend Developer (Next.js) — Quéjate.com.co | 2025–2026

Contributions to the platform's web backend in production

- Built the full password recovery flow: 6-digit OTP with 15-min expiry, bcryptjs hashing, per-user rate limiting, and anti-enumeration pattern.
- Designed the mobile session restore endpoint (Bearer auth) to prevent re-login on app open, and fixed bugs in currentUser() that blocked critical fields when authenticating via header.
- Built notification endpoints with ownership verification (403/404) and integrated optimistic deletion in the web UI with error rollback via Zustand.
- Implemented production schema migrations with zero downtime using safe Prisma patterns (db execute + migrate resolve --applied).
- Built getOverdueInfo() as the backend source of truth for PQRSD overdue calculation, eliminating client-side discrepancies. Extended Colombian holidays to 2026 with Ley Emiliani rules.
- Built OpenGraph routes for rich previews on WhatsApp, Facebook, and Twitter. Fixed an OTP email logo bug by implementing inline base64 encoding.

Stack: Next.js 15 · TypeScript · Prisma ORM · PostgreSQL · Auth.js v5 · AWS S3 · Resend · Zod · Vercel

PROJECTS

FindMyWorker — Home services marketplace (live in production)

- Designed semantic recommendation engine (TF-IDF + cosine similarity + PostGIS): MRR 0.75, CTR 42%.
- Geospatial search up to 200 km, response <50 ms (78% cache hit). Payment escrow. Real-time chat with WebSockets + Redis.

- 70% image payload reduction via AWS S3 compression. Test coverage >85% (50+ automated tests).
- **Stack:** Python · Django · React · TypeScript · PostGIS · Redis · AWS S3

AeroMagdalena — Full-stack system for a regional airline

- Spring Boot 3 REST API with JWT, roles, OpenAPI/Swagger, Docker. React + TypeScript SPA with TanStack Query and full booking flow.
- **Stack:** Java · Spring Boot 3 · React · TypeScript · PostgreSQL · Docker

SafeHaven — Management system for a psychology clinic

- Role-based access (Admin, Psychologist, Patient), appointment scheduling, billing, and clinical history.
- **Stack:** Spring Boot 3 · React · TypeScript · PostgreSQL

SenseAble — Visual accessibility Android app

- Native Kotlin app with automatic OCR (Google ML Kit) and Text-to-Speech narration. Clean/MVVM architecture.

EDUCATION

B.Sc. Systems Engineering — Universidad del Magdalena | 2021 – Present

- Pending professional internship for graduation.
- Continuous self-study in Machine Learning, microservices, spatial databases, and testing methodologies.

LANGUAGES

- **Spanish:** Native
- **English:** B2 Intermediate — Duolingo English Test: 130. Strong ability to read technical documentation and communicate in English.
