PROFESSIONAL PROFILE

Systems Engineering student with hands-on experience building end-to-end web and mobile applications. Proficient in Python/Django, Java/Spring Boot, React/TypeScript, and Android/Kotlin. Proven track record in performance optimization (searches <50 ms, test coverage >85%) and agile team collaboration. Seeking a professional internship to complete my degree.

TECHNICAL SKILLS

- **Backend:** Python, Django, Django REST Framework, Java, Spring Boot 3, Node.js, Next.js API Routes, WebSockets, JWT, NextAuth.js, Prisma ORM, OpenAPI/Swagger
- **Frontend:** React, TypeScript, JavaScript, Next.js (App Router), Tailwind CSS, TanStack Query, Leaflet
- **Databases:** PostgreSQL, PostGIS, MySQL, SQL Server, Redis
- **Cloud & DevOps:** AWS S3, AWS Lambda, Docker, Azure DevOps, Git, GitHub, CI/CD, ESLint
- **Mobile:** Kotlin, Android Studio, Google ML Kit (OCR), Text-to-Speech, Clean/MVVM
- **ML/NLP:** scikit-learn, NLTK, TF-IDF, cosine similarity, recommendation systems

EXPERIENCE

Backend & Mobile Developer — Quéjate.com.co | 2025–2026 (~6–7 months total)

Citizen complaint management platform (Petitions, Complaints, Claims, Suggestions & Reports)

- Built REST APIs with Django and Next.js API Routes for dynamic forms, validations, and authentication flows.
- Implemented real-time notifications, AWS S3 file storage integration, and GPT API integration.
- Developed a statistics module, role-based access control system, and PDF report generation using ReportLab.
- Built a native Android app in Kotlin for mobile access to the platform.
- Applied strict TypeScript typing, Zod validation, and security best practices.

PROJECTS

FindMyWorker — Home services marketplace (live in production)

- Designed and implemented a semantic recommendation engine using TF-IDF + cosine similarity + PostGIS, achieving MRR of 0.75 and 42% CTR.
- Built geospatial search (up to 200 km radius) with response times <50 ms (78% cache hit rate).
- Developed real-time chat with WebSockets (Django Channels + Redis) and a payment escrow system.
- Reduced image payload by 70% via automatic compression in AWS S3. Test coverage >85% (50+ automated tests).
- Stack: Python, Django, React, TypeScript, PostGIS, Redis, AWS S3 | github.com/anuarthr/FindMyWorkerBackend

AeroMagdalena — Full-stack system for a regional airline

- Designed REST API with Spring Boot 3, JWT, role-based access, OpenAPI/Swagger docs, and Docker containerization.
- Built React + TypeScript SPA with TanStack Query, admin panel, and complete booking flow.
- Stack: Java, Spring Boot 3, React, TypeScript, PostgreSQL, Docker | github.com/anuarthr/aeromagdalena-backend-v2

SafeHaven — Management system for a psychology clinic

- Implemented role-based access (Admin, Psychologist, Patient), appointment scheduling, billing, and clinical history.
- Stack: Spring Boot 3, React, TypeScript, PostgreSQL | github.com/anuarthr/safehaven-backend-v2

SenseAble — Visual accessibility Android app

- Built native Kotlin app with automatic OCR (Google ML Kit camera integration) and Text-to-Speech narration. Clean/MVVM architecture.
- github.com/anuarthr/SenseAble

EDUCATION

B.Sc. Systems Engineering — Universidad del Magdalena | 2021 – Present

- Pending professional internship for graduation.

- Continuous self-study in Machine Learning, microservices architecture, spatial databases, and testing methodologies.

LANGUAGES

- **Spanish:** Native
- **English:** Intermediate B2 — Duolingo English Test: 130. Strong ability to read technical documentation and communicate in English.
